

WE PUT 30' OF 10" CASING IN TO SHUT OFF THE WATER THAT
CAME IN FROM THE CREEK AT 20' AND CEMENTED UP THROUGH
BETWEEN THE TWO CASINGS.

THE OLD BARN THAT IS ABOUT 30' BELOW THE WELL IS BEING
TAKEN DOWN NOW.

THERE HAS BEEN NO ONE LIVING ON THIS FARM FOR SOME TIME.
THE 10" CASING THAT WE PUT IN I DO NOT KNOW THE EXACT
WEIGHT PER FOOT BUT IT IS THE HEAVY THICK WALLED THAT
IS USED IN WIS.
